

R H

ROBERT HERMAN

PROFILE SUMMARY

Resourceful software developer with over a decade of experience designing, building, and optimizing web and enterprise applications. Skilled in both front-end and back-end development, with deep expertise in SQL, C#, and VB.NET. Proven ability to modernize legacy systems, architect large-scale databases, and deliver performant, maintainable solutions. Experienced with cloud platforms, automated testing, and AI-powered coding tools. Collaborative, adaptable, and driven to turn complex technical challenges into business value.

CORE QUALIFICATIONS

- Designed and implemented a replacement database architecture supporting millions of vehicles and hundreds of millions of parts.
- Hands-on experience with enterprise-scale systems, microservices, and API integrations.
- Skilled in optimizing SQL performance, reducing query and report execution times significantly.
- Strong track record of reverse-engineering legacy systems and delivering maintainable, modernized solutions.
- AWS Certified Cloud Practitioner with growing expertise in cloud technologies and AI-assisted development tools (Copilot, Qodo, Cursor).

TECHNICAL PROFICIENCIES

- **Languages & Frameworks:** C#, VB.NET, JavaScript, AJAX, HTML5, Blazor, LINQ, Entity Framework
- **Databases:** Oracle SQL, T-SQL, database architecture, performance tuning, stored procedures
- **Cloud:** AWS (Certified Cloud Practitioner), Azure
- **Testing & Tools:** NUnit, Crystal Reports, Ninject (dependency injection), MVC4
- **Other:** REST & SOAP APIs, automated testing, debugging, technical documentation, Copilot/Qodo/Cursor

PROFESSIONAL EXPERIENCE

Intralot

10/2021 – 08/2025

Programmer

- Developed and maintained backend services in C# and VB.NET, supporting mission-critical gaming and lottery systems.
- Designed and optimized complex Oracle SQL stored procedures and queries, improving reporting and transaction processing speeds.
- Reverse-engineered large volumes of legacy VB.NET code, documenting and refactoring for improved maintainability.
- Created and maintained Crystal Reports for business intelligence and compliance needs.
- Leveraged Copilot and AI tools to accelerate development, improving coding throughput and database performance tuning.

AmTrust Financial, Cleveland

01/2014 - 10/2021

Software Developer II

- Designed and implemented a replacement database architecture managing millions of vehicles and hundreds of millions of parts, improving scalability and data integrity.
- Built and maintained backend APIs and microservices in C# and VB.NET, integrating with external SOAP services for insurance data exchange.
- Collaborated with front-end teams to build dynamic, responsive features in JavaScript, AJAX, and HTML5, improving usability of enterprise systems.
- Partnered with infrastructure teams to develop secure file storage and retrieval workflows, enabling efficient web-based document access.
- Introduced Ninject dependency injection and NUnit testing frameworks, reducing defects and improving project maintainability.

Yellowstone Hotel Systems, Akron

06/2012 –12/2012

Programmer

- Contributed to a B2B SaaS hospitality platform hosted on Microsoft Azure.
- Enhanced product features using MVC4, jQuery, LINQ, and Entity Framework.
- Debugged production issues and delivered on-demand feature changes to support business clients.

KEY SKILLS

Software Development • Database Architecture • API Development • Automated Testing • Debugging & Troubleshooting • System Integrations • Cloud Computing • Performance Optimization • Documentation • Team Collaboration

EDUCATION

University of Akron - Bachelors in Computer Science

08/2007 – 05/2014
